Live Streaming, Virtual Events and Live Production

We can cover a range of events such as conferencing, weddings, birthdays, funerals etc. Events your family, friends & colleagues won't want to miss

We are seeing more and more areas in our lives move online and streaming is an amazing way of showing others what can be done, recently seeing this with schools teaching online

We are able to stream through multiple platforms ranging from sites such as YouTube and Facebook or video call sites such as Teams, Zoom or Skype

The camera setup we have will be able to stream in full HD 1080p recording and delivery

We know that mobile phones are widely used in this area and can be operated by everyone, however by utilizing top quality streaming products and services you can rest easy knowing that the video recording the event will be of the highest visual and sound quality for all to enjoy

As well as live streaming, the video can be recorded as a keepsake to watch over again and again

We offer a full range of sound systems, radio microphones, effects lighting and video packages to enhance your Audio Visual presentations

Any questions please feel free to contact us
